Lydia,
Philip will start working on the SOW and should have it ready by March 15, 2013.

Subject: Cedar Chemical - Planning for SNL/SOW/AOC

Mark, Carlos,
The report on the link between the tolling agreements and the contaminants of concern is due from the ESS contractor at the end of this month. With an additional couple of weeks for the review of the report, issuing special notice could be done the first week of April. Are there any issues with having the draft SOW and AOC ready for concurrence by March 15?
Thanks,
Lydia
